# Kas tie “Debesys” (aka Clouds)

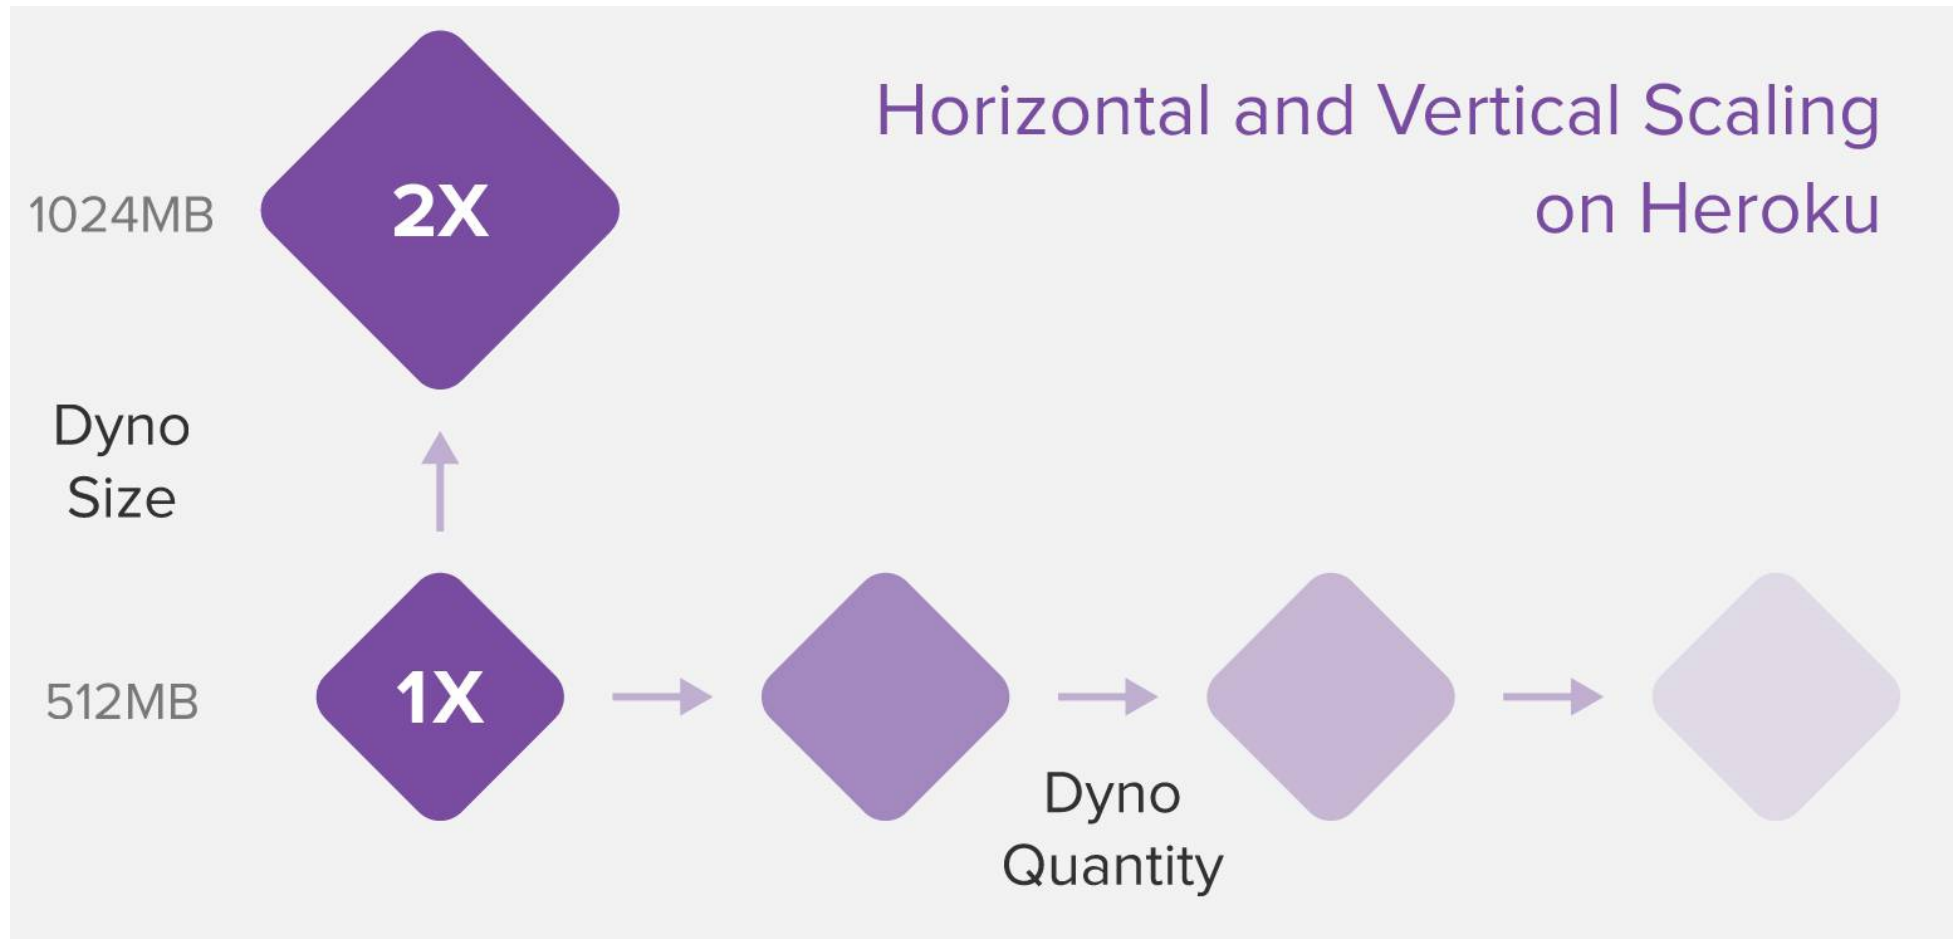

Cloud computing, or the cloud, is a colloquial expression used to describe a variety of different types of computing concepts that involve a large number of computers connected through a real-time communication network such as the Internet. **Cloud computing is a term without** a commonly accepted unequivocal scientific or technical **definition**. In science, cloud computing is a **synonym for distributed computing** over a network and means the ability to run a program on many connected computers at the same time.
